Education

Bachelor of Science in Mathematics, Korea University, Seoul (3.77/4.5)	2015.02
Master of Science in Mathematics, Korea University, Seoul (3.92/4.5)	2024.02

Graduate School

Lipschitz constants of deep neural networks · Survey paper on stability of AI architectures (Master's thesis)	2022.07 – 2024.02
Distribution of TeX Template for Korea university graduate school · TeX template for thesis and dissertation with math included papers	2022.12 – 2023.02
Stock prediction using LSTM and wavelet · KOSPI 200, binary classification (up/down, accuracy: 0.58)	2020.07 – 2020.12

Working Experiences

UI networks, 교통연구본부, 대리 · Development and distribution of signal generation and traffic assignment algorithms in Seongnam ITS(intelligent transport system) - signal generation: simultaneous signal via signal DB - traffic assignment: align traffic volume using linear programming	2023.09 – 2024.10
IBEDU, math teacher · Teaching mathematics online 20+ students	2021.12 – 2022.11
private math teacher · Teaching mathematics offline 50+ students	2014.03 – 2018.12

Data Analytics Experiences

Suggesting SOCAR zone locations · Aiffelthon of MODULABS, data provided by SOCAR	2022.12 – 2023.02
Anomaly detection on manufacturing · LSTM classification on imbalanced data (f1 score: 0.87)	2022.10 – 2023.11
Recommendation system on 아이들나라 · Enhancing model of neural collaborative filtering (recall: 0.2273, NDCG: 0.21)	2022.11 – 2023.12

Programming and Math

data processing	· numpy	· pandas	· scikit-learn
data visualization	· matplotlib	· seaborn	
machine learning	· tensorflow	· pytorch	· keras
code management	· git	· VS code	
math documentation	· TeX	· LaTeX	· github blog
math tool	· geogebra	· (mathematica)	· (matlab)
mathematics	· calculus	· analysis	· linear algebra
	· probability	· abstract algebra	· set theory
